

## Sound-insulated inline mixed-flow fan Iso-Mix

### APPLICATION

Iso MIX fans are specially designed for supply and exhaust ventilation of premises requiring with high requirements to noise level. These fans are enclosed in a specially designed sound-insulated casing that ensures silent fan operation in combination with high aerodynamic characteristics. These fans are featured with wide capabilities and high performance of axial and centrifugal fans thus providing powerful air stream and high pressure. The fans are compatible with Ø 100 to 315 mm.

**Areas of Application :** Best Solution for Ventilation in libraries, conference halls, educational institutions, kindergartens, health care and child care facilities etc. where noise is a major criteria.

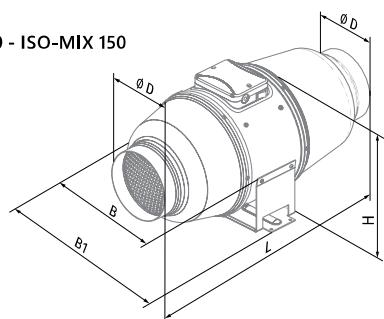

### DESIGN

- The fan Casing made of polymer-coated steel.
- The inner casing is internally filled with 50 mm mineral wool thermal- and sound-insulating layer.
- Special inner perforation of the casing and sound-insulating material are designed for wide-frequency sound absorbing. The inner casing perforation let sound waves pass through the holes and fall at a specific angle to the sound-absorbing layer
- The inner casing and the impeller are made of high-quality durable plastic.
- The diffuser, the specially profiled impeller and the directing vanes at outlet from the fan casing distribute air flow in such a way as to attain the best combination of high performance, enhanced pressure and low noise.
